PROFESSIONAL SUMMARY

Junior Frontend Developer focused on building modern, interactive, and scalable web applications using JavaScript (ES6+) and React JS. Graduated with Top 10 honors from the Frontend React Development Track at Coderhouse. Hands-on experience as a Freelance Frontend Developer creating reusable UI components, state management, and web software solutions. Strong foundation in responsive web design, API integration, clean code practices, and version control using Git.

TECHNICAL SKILLS

- **Frontend Development:** HTML5, CSS3, JavaScript (ES6+), React JS, Single Page Applications (SPA), Responsive Web Design, Component-Based Architecture, DOM Manipulation.
- **Version Control & Tools:** Git, GitHub, Visual Studio Code, NPM.

PROFESSIONAL EXPERIENCE

Freelance Frontend Developer *— January 2026 – Present*

- **Web Application Development:** Built and deployed modern web applications utilizing JavaScript, React JS, HTML5, and CSS3.
- **Component Architecture:** Designed user interfaces and reusable React components to improve overall code maintainability and scalability.
- **Interactivity & State:** Implemented interactive features and state management across React applications.
- **Key Projects:** Developed web solutions focused on property, tenant, and rental payment management, as well as commercial platforms (Featured project: RentaFácil EC).
- **Version Control & Testing:** Utilized Git and GitHub for repository management, debugging, testing, and continuous feature improvement.

SOFTWARE DEVELOPMENT PROJECTS

1. RentaFácil EC — Property Management System (In Development)

- **Repository:** github.com/CristianPaez17/propertyRegistry
- **Description:** Developing a web application for property, tenant, and rental payment management, implementing reusable React components and state management.
- **Technologies:** JavaScript, React JS, HTML5, CSS3.

2. SportsStore — Sports E-commerce Store

- **Repository / Demo:** github.com/CristianPaez17/SportsStore | Demo: cristianpaez17.github.io/SportsStore/
- **Description:** Developed a web user interface for a sports store applying frontend development concepts, responsive design, and GitHub Pages deployment.

3. Licorería Ecuador — Commercial Web Application

- **Repository / Demo:** github.com/CristianPaez17/LicoreriaEcuadorfin | Demo: cristianpaez17.github.io/LicoreriaEcuadorfin/

- **Description:** Developed a commercial business website focusing on semantic structure, modern styling, and interactive JavaScript functionality.

4. Store Quito — E-commerce Web Application

- **Repository:** github.com/CristianPaez17/store-Quito
- **Description:** Developed a frontend application using React and Vite, structured with modular components and clean JavaScript practices.
